Item 2.02 – Results of Operations and Financial Condition.

On July 21, 2008, IDEX Corporation issued a press release announcing financial results for the second quarter ended June 30, 2008.

A copy of the press release is furnished as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

The information contained in Item 2.02 of this Current Report on Form 8-K (including the press release) is being furnished and shall not be deemed “filed” for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that Section. The information contained in Item 2.02 of this Current Report on Form 8-K (including the press release) shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in any such filing.

Item 2.05 – Costs Associated with Exit or Disposal Activities.

On July 16, 2008, IDEX Corporation initiated procedures to cease manufacturing operations at the Dispensing segment’s Milan, Italy facility. The European operational footprint consolidation is consistent with management’s capacity utilization strategy for the Dispensing segment and is expected to generate approximately \$3 to \$4 million of annual savings beginning in 2009. The consolidation relating to the Milan, Italy facility is expected to be substantially complete by the end of the fourth quarter of 2008.

The estimated exit costs range between approximately \$5 million and \$6 million before income taxes and are expected to be offset by a gain on the divestiture of the facility. Of the estimated exit costs, approximately 90% are cash costs including employee severance payments and moving costs, while the remaining non-cash costs are primarily asset write-downs. Due to uncertainty in the timing of the facility divestiture, formalization of specific severance plans and identification of assets that will be moved or disposed, the breakdown of the expected costs to be incurred between the quarter ending September 30, 2008 and the quarter ending December 31, 2008 is not feasible at this time.

This Current Report on Form 8-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks, uncertainties and reflect the company’s judgment as of the date of this report. Forward-looking statements include, but are not limited to, statements concerning future changes in operations, operating income or gross margin improvements, capital and other expenditures, consolidation costs and cost savings and management’s plans, projections and objectives for future operations and performance. Forward-looking statements may involve risks and uncertainties that could cause actual results to differ materially from predicted or expected results.

Item 9.01 – Financial Statements and Exhibits.

99.1

Second quarter 2008 earnings release dated July 21, 2008

**IDEX CORPORATION REPORTS SECOND QUARTER 2008 RESULTS;
19% ORDERS GROWTH, 15% SALES GROWTH AND 10% INCREASE IN DILUTED EPS**

NORTHBROOK, IL, July 21 – IDEX Corporation (NYSE: IEX) today announced second quarter 2008 results.

New orders in the quarter totaled \$402 million, 19 percent higher than the prior-year period. Sales in the quarter totaled \$397 million, 15 percent higher than the prior-year period. International sales represented approximately 47 percent of total sales for the second quarter of 2008 compared to 46 percent in 2007.

Second quarter operating income of \$74 million was 7 percent higher than the prior-year period. Operating margin of 18.6 percent reflected a 140 basis point decline versus the prior-year period, primarily due to the impact of intangible amortization expenses associated with recent acquisitions. Compared to the first quarter of 2008, operating margin increased by 30 basis points.

Income from continuing operations of \$46 million increased 10 percent over the second quarter of the previous year. Diluted earnings per share from continuing operations of 56 cents improved 5 cents, or 10 percent, from the second quarter of the previous year.

Second Quarter 2008 Highlights (from Continuing Operations)

- Orders increased 19 percent compared to the prior-year period (8 percent acquisitions, 7 percent organic and 4 percent foreign currency translation)
- Sales increased 15 percent compared to the prior-year period (7 percent acquisitions, 5 percent organic and 3 percent foreign currency translation)
- Income increased 10 percent to \$46 million
- Diluted EPS at 56 cents was 5 cents, or 10 percent, ahead of the prior-year period
- EBITDA of \$87 million was 22 percent of sales and covered interest expense by more than 21 times
- Second quarter free cash flow of \$61 million represented 132 percent of net income

“Overall, our markets are solid and our business performance for the second quarter of 2008 was strong. Growth in the Fluid and Metering Technologies segment was driven by global demand in the infrastructure-related end markets. In the Health and Science Technologies segment, the growth was driven by core analytical instrumentation, IVD and biotechnology markets. Strength in our engineered band clamping and rescue tools businesses was offset by softness in the fire suppression market within the Fire & Safety/Diversified Products segment. Within Dispensing, we experienced modest growth in both the European and North American markets.

Given our outlook and current market conditions, we expect full year 2008 total revenue growth in the range of 13 to 15 percent and EPS to range from \$2.12 to \$2.18 compared to \$1.90 in the prior year. In addition, 2008 free cash flow is projected to exceed net income by 10 to 20 percent. For the third quarter of 2008, we project total revenue growth in the range of 14 to 16 percent and EPS in the range of 53 to 56 cents per diluted share.

Overall, we are pleased with our second quarter 2008 results and we anticipate continued strong performance in the second half of 2008.”

Lawrence D. Kingsley
Chairman and Chief Executive Officer

Business Highlights

Fluid & Metering Technologies

- o Sales in the second quarter of \$177.4 million reflected 26 percent growth (16 percent acquisitions, 8 percent organic and 2 percent foreign currency translation). Growth was driven by continued global demand for infrastructure-related applications and acquisition performance.
- o Operating margin of 19.5 percent represented a 190 basis point decline compared with the second quarter of 2007, primarily due to the impact of recent acquisitions.

Health & Science Technologies

- o Sales in the second quarter of \$87.2 million reflected 6 percent growth (3 percent acquisitions, 1 percent organic and 2 percent foreign currency translation). Strong growth in core analytical instrumentation, IVD and biotechnology markets was partially offset by the previously announced exit from two specific OEM contracts.
- o Operating margin of 18.4 percent was flat compared with the second quarter of 2007.

Dispensing Equipment

- o Sales of \$56.6 million in the second quarter reflected 14 percent growth compared with the second quarter of 2007 (3 percent organic and 11 percent foreign currency translation). The modest growth was balanced evenly between both the European and North American markets.
- o Operating margin of 25.3 percent represented a 330 basis point decline compared with the second quarter of 2007, primarily due to foreign currency translation and selective material cost increases.

Fire & Safety/Diversified Products

- o Sales in the second quarter of \$77.2 million reflected 6 percent growth compared with the prior year (2 percent organic and 4 percent foreign currency translation). The engineered band clamping business as well as the rescue tools business achieved strong growth, offset by weak demand in the North American fire suppression market.
- o Operating margin of 24.1 percent represented an 80 basis point decline compared with the second quarter of 2007.

For the second quarter of 2008, Fluid & Metering Technologies contributed 45 percent of sales and 42 percent operating income; Health & Science Technologies accounted for 22 percent of sales and 19 percent of operating income; Dispensing Equipment accounted for 14 percent of sales and 17 percent of operating income; and Fire & Safety/Diversified Products represented 19 percent of sales and 22 percent of operating income.

Restructuring

In July, the company initiated the ceasing of manufacturing operations in the Dispensing segment's Milan, Italy facility. The European operational footprint consolidation is consistent with the Dispensing segment's capacity utilization strategy and is expected to generate \$3 to \$4 million of annual savings beginning in 2009. The projected restructuring cost is estimated at \$5 to \$6 million and is expected to be offset by a gain on the divestiture of the facility. Due to uncertain timing of the facility divestiture and formalization of specific severance plans, the net earnings impact is not included in the third quarter or full year earnings per share guidance and will be further discussed in subsequent earnings releases.

Conference Call to be Broadcast over the Internet

IDEX will broadcast its second quarter earnings conference call over the Internet on Tuesday, July 22, 2008 at 9:30 a.m. CT. Chairman and Chief Executive Officer Larry Kingsley and Vice President and Chief Financial Officer Dominic Romeo will discuss the company's recent financial performance and respond to questions from the financial analyst community. IDEX invites interested investors to listen to the call and view the accompanying slide presentation, which will be carried live on its website at www.idexcorp.com. Those who wish to participate should log on several minutes before the discussion begins. After clicking on the presentation icon, investors should follow the instructions to ensure their systems are set up to hear the event and view the presentation slides, or download the correct applications at no charge. Investors also will be able to hear a replay of the call by dialing 888.203.1112 or 719.457.0820 and using conference ID #4450651.

A Note on EBITDA and Free Cash Flow

EBITDA means earnings before interest, income taxes, depreciation and amortization, while free cash flow means cash flow from operating activities less capital expenditures plus the excess tax benefit from stock-based compensation. Management uses these non-GAAP financial measures as internal operating metrics and for enterprise valuation purposes. Management believes these measures are useful as analytical indicators of leverage capacity and debt servicing ability, and uses them to measure financial performance as well as for planning purposes. However, they should not be considered as alternatives to net income, cash flow from operating activities or any other items calculated in accordance with U.S. GAAP, or as an indicator of operating performance. The definitions of EBITDA and free cash flow used here may differ from those used by other companies.

Forward-Looking Statements

This news release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Exchange Act of 1934, as amended. These statements may relate to, among other things, capital expenditures, cost reductions, cash flow, and operating improvements and are indicated by words or phrases such as “anticipate,” “estimate,” “plans,” “expects,” “projects,” “should,” “will,” “management believes,” “the company believes,” “the company intends,” and similar words or phrases. These statements are subject to inherent uncertainties and risks that could cause actual results to differ materially from those anticipated at the date of this news release. The risks and uncertainties include, but are not limited to, the following: economic and political consequences resulting from terrorist attacks and wars; levels of industrial activity and economic conditions in the U.S. and other countries around the world; pricing pressures and other competitive factors, and levels of capital spending in certain industries – all of which could have a material impact on order rates and IDEX’s results, particularly in light of the low levels of order backlogs it typically maintains; its ability to make acquisitions and to integrate and operate acquired businesses on a profitable basis; the relationship of the U.S. dollar to other currencies and its impact on pricing and cost competitiveness; political and economic conditions in foreign countries in which the company operates; interest rates; capacity utilization and the effect this has on costs; labor markets; market conditions and material costs; and developments with respect to contingencies, such as litigation and environmental matters. The forward-looking statements included here are only made as of the date of this news release, and management undertakes no obligation to publicly update them to reflect subsequent events or circumstances. Investors are cautioned not to rely unduly on forward-looking statements when evaluating the information presented here.

About IDEX

IDEX Corporation is an applied solutions company specializing in fluid and metering technologies, health and science technologies, dispensing equipment, and fire, safety and other diversified products built to its customers’ exacting specifications. Its products are sold in niche markets to a wide range of industries throughout the world. IDEX shares are traded on the New York Stock Exchange and Chicago Stock Exchange under the symbol “IEX”.

For further information on IDEX Corporation and its business units, visit the company’s Web site at www.idexcorp.com.
